

Case Study

Customer: Slicker Recycling (formerly Hydrodec UK Ltd)

Location: Ipswich, Suffolk

Task: To empty, clean and gas free one 400 tonne and one 200 tonne heavy fuel oil tanks ready for inspection and repair by third parties.

- Mechanical isolation of the tanks
- Secondary bund formation around the manways
- Removal of c 200 tonnes of heavy sludge
- Scaffolding erection inside each tank
- High pressure water jetting of internal surfaces
- Removal of all hazardous waste
- Transport and recycling of all wastes removed at our Cambridge treatment facility
- Provision of gas free certificates
- De-isolation of tanks to return them to use

The project was completed within 20 days and within the timeframe allocated.
